

List of Possible Circumcisers in Australia and New Zealand

© The Circumcision Academy of Australia Inc

Circumcision Academy of Australia Inc (CAA)

PO Box 1776, Bondi Junction, NSW 2022

<http://www.circumcisionaustralia.org>

Introduction

This booklet applies to *male circumcision only*, not other aspects of the medical practice of the doctors or medical practices listed.

The names, addresses, and other information in this booklet are given in good faith and are believed to be correct at the time of printing. They have been gathered together from a variety of sources including personal recommendations, radio, newspaper and magazine advertising. It should be noted that some doctors may have moved or ceased practice since the information was obtained. The CAA recognizes that there are many other doctors who perform circumcisions. The list only includes those the CAA is aware of.

The list includes doctors who do infant circumcisions, as well as circumcision of older children, adolescents and men. Some only circumcise infants, whereas some only circumcise older males, and some do circumcisions for any age. This is stated where known, but circumstances do change and the CAA does not always have full details of the latest practice. Some of the doctors and clinics listed will only circumcise where there is a clear medical need (but in some cases psychological need will be considered). Some, including those mohelim who are not doctors, will only circumcise infants. Phimosis is a common reason for circumcision. Prevention of risk of an adverse condition, infection or cancer in the future is regarded by some as a medically valid reason for circumcision. As a result many now regard circumcision as a 'surgical vaccine'.

Where fees are quoted these are the ones last known to the CAA and may not be complete or up to date. Readers are advised to carefully check what fees will be charged, and what they cover, before making any appointment.

Disclaimer

No recommendation is made by the CAA, nor intended, as to qualifications or competence of practitioners nor the quality of advice provided by other organizations, some of which is inferior. Any reader making use of the services of any of the people or organizations listed, or any other information in this booklet, must satisfy themselves as to the standard of the advice and services which they are offered, and as to how appropriate such advice or services may be to their own needs. No responsibility can be accepted by the CAA for any consequences that may follow from the use to which a reader may put the information herein. Nothing herein is intended as, nor should it be construed as, 'medical advice'. Since circumstances of each patient varies only a direct consultation with a medical practitioner can be used to obtain the medical advice appropriate for the particular needs and quality of care of each individual.

Abbreviations and Symbols Used

[F] immediately following a practitioner's name indicates that they are Female (where this fact is known for certain). Its absence does not imply that the doctor is male.

[ISL] immediately following a practitioner's name indicates that they are Moslem or are versed in providing circumcisions for the Islamic community, not necessarily that they themselves are Moslem.

[J] immediately following a practitioner's name indicates that he is known to be a Jewish doctor or mohel.

[REF] immediately following a name indicates that the entry refers to an organization, or person, which may not perform or directly arrange circumcisions, but which will refer enquirers to a suitable practitioner.

The year, e.g., *[2013]*, at the end of an entry indicates the date when the information was obtained or last updated.

[R] immediately preceding the year indicates a recommendation by one or more patients. It does not necessarily imply recommendation by the CAA

The Titles – 'Dr', 'Mr', etc

The individual circumcision practitioners listed in this booklet are believed to be medically qualified if their name is preceded by the title 'Dr' or 'Mr'. Those for whom neither title is given are not known to be medically qualified (generally these are registered Jewish Mohelim competent only in the circumcision of infants). Readers should be aware however that in some countries there is no legal requirement to be registered in any way in order to perform circumcisions.

In parts of the British Commonwealth and some other places, specialist Consultants, surgeons and many doctors in private practice do not use the title 'Dr' but are known as 'Mr'. This is reflected in the listings where the preferred title is known, otherwise the default title of 'Dr' is used. The use in this listing of the titles 'Dr' and 'Mr' does not therefore imply any greater or lesser knowledge and skill.

Addresses

The address given for a practitioner is, where known, that of the place where he or she practices but in some cases may be his or her home address and not that of the Practice.

Additions and Corrections

Readers are asked to advise the CAA of any errors found in this booklet. Additional names and addresses from any part of the world, as well as other information relating to any entry would be very useful in order to improve our listings and provide a better service to readers. Information can be sent by post or e-mail to: brian.morris@sydney.edu.au

Acceptable Use

This listing is provided for personal use only to find a doctor to circumcise you or your son. It may not be used for any commercial purpose and any such commercial use is a breach of copyright.
